

CVE PYTHON PROJECT

BAGHIROV MEHMAN REPORT

Throughout the duration of the project, I assumed the role of the team lead, overseeing the overall progress and ensuring effective collaboration among team members. My contributions primarily focused on project management, including task allocation, scheduling, and coordination. Additionally, I actively participated in the development process, particularly in the backend implementation and integration of various components.

As the team lead, I facilitated communication among team members, addressed any issues or conflicts that arose, and ensured that everyone remained aligned with the project objectives. I also provided guidance and support to team members, helping them overcome challenges and stay motivated.

Through this project, I have learned valuable leadership skills, including effective communication, delegation, and conflict resolution. I have also enhanced my technical abilities, particularly in Python programming and web scraping techniques.

Collaborating with my team has been a rewarding experience, and I am proud of the cohesive effort we put into delivering a high-quality project. Each team member's unique strengths and contributions were instrumental in achieving our goals, and I am grateful for the opportunity to work with such talented individuals.
